GEARLE

An alternative source of energy production is as a safeguard in the event of a power fail

- ▶ **Gearlec** is a tractor-mounted PTO alternator designed for fixed use as emergency power for buildings or agricultural tools. It helps secure energy for farms at a lower cost by taking advantage of the mechanical power produced by tractors.
- ▶ **With a robust and reliable design**, Gearlec is an effective protection against the climatic and technological hazards that can affect modern farms.

Prior to use, GEARLEC should be equipped with an electrical distribution, protection and control panel, in compliance with local regulations currently in force.

The Gearlec range complies with the main international standards: EC marking, IEC 60034, NEMA MG 1.32-33, UL 1446, ISO 8528-3. Gearlec is designed, manufactured and marketed in an ISO 9001 and ISO 14001 environment.
